

Occupational Health
And Safety Policy

Occupational Healthy And Safety

At Omega, we transform the world and society through clean, affordable, and simple energy. We are committed to driving this transformation safely, leaving no one behind. We believe that by providing a safe and healthy work environment, we strengthen our relationship with stakeholders and build a legacy that consolidates Omega as the company we all want to be.

We have set our Occupational Health and Safety commitments detailed in this Policy according to one of our main Sustainable Development Goals (SDGs), SDG 8 – Decent Work and Economic Growth.

We are committed to strict management of health and safety practices, and we require the same from our suppliers and partners. We work with integrity and transparency. We conduct our business ethically and do not tolerate any violation of the law or agreements that we have voluntarily entered into.

We build a culture of health and safety excellence in our operations, construction works, and offices, by implementing processes with high standards. And we require our suppliers, partners, and everyone who interacts with us to follow the same standards. We act preventively, identifying and communicating, risks and opportunities in a swift, transparent, and barrier-free manner.

We are problem solvers, we manage risks based on an analytical and sustainable view, using technology in our favor. We have the autonomy and responsibility to immediately report and intervene in unsafe conditions and behaviors before an injury or damage occurs.

We believe that safety is everyone's responsibility. Supported by the company's strategic direction and driven by the role modeling of our leaders, we seek to evolve every day and ensure that the health and safety culture is part of everything we do.
